

A Trusted Partner for an **Expedited Hiring Effort**

The Challenge: A top regional academic hospital located in the southeastern United States was opening a new unit and required a large number of Med Surg / Telemetry RNs to start generating revenue as soon as the unit opened. The facility turned to Jackson Nurse Professionals, one of the Jackson Health Collective companies they had a long-standing partnership with, to fill the needs knowing there was a tight turnaround to get the staff hired and fully credentialed to start on time. To facilitate the ramp up, the client requested various start dates, contract lengths, and shifts to ensure coverage as they worked to bring on permanent staff.

The Solution: The team used a dedicated team of recruiters across multiple Jackson Health Collective companies to focus on finding qualified RNs, tapping into a database of 800,00+ nurses.

- Jobs were highlighted on various partner job boards and apps for additional visibility
- Clinicians with matching credentials were notified of the openings via email, text, and app notifications
- The facility agreed to quick interviews and hiring decisions
- The credentialing team committed to an expedited compliance timeline

As a result of the combined efforts and extra focus, 12 RNs were hired and fully credentialed within a four-week window. All shifts were covered for the unit opening and the facility has continued to partner with Jackson Nurse Professionals for workforce solutions.

“*They delivered on their promise to provide quality nurses quickly to meet our needs. Their ability to remain nimble and act fast while delivering quality is unmatched.*”

- Tammy, AVP Resource Management, Contract Services
